

STRAIGHTLINE MEDIA WALL

ASSEMBLY INSTRUCTIONS

Lay Out All Components

Place all frame parts, bases, and the printed fabric on the floor in order. This helps you identify each piece before assembly.

Connect the Frame Sections

Join all pole sections that are linked by internal elastic rope. Insert each smaller tube into the corresponding larger tube, press the push-pin button, and snap the poles into place. Continue until the entire rectangular frame shape is complete.

Attach the Curved Corners

Use the curved corner bars to connect the vertical and horizontal poles at the top corners of the frame.

Connect the Bases

Insert the bottom ends of the left and right vertical poles into the metal bases. Ensure each pole locks securely into place.

Install the Fabric Graphic

Slide the fabric graphic over the top of the frame like a sleeve. Pull it down until the print is fully stretched and aligned.

Zip the Graphic Closed

At the bottom of the frame, close the zipper to tension the fabric evenly. Your StraightLine Media Wall is now ready for display.
